Chapter 1 The Universe

Q:-1. Fill in the blanks.

- 1 The milky way is also known as the..... (**Akash Ganga**)
2. The biggest member of the solar system is the(**Sun**)
3. There are(**eight**) planets in the solar system.
4. The smaller companions of the planet are there(**satellite**)
5. The universe contains thousands of (**stars**).

Q:-2 Match the columns:

- | | |
|-----------------------------|------------|
| 1. Biggest planet | a. Saturn |
| 2. Red planet | b. Venus |
| 3. Eighth planet. | c. Mars |
| 4. Ringed planet. | d. Neptune |
| 5. Morning and evening star | e. Jupiter |

Ans: 1- _ 2- _ 3- _ 4- _ 5- _

Q:-3 Name the following:

1. Heavenly bodies

ans:- sun, star, moon

2. Big Bang created

ans:- star, planets, Galaxy

3. Two movements of the planets.

ans:- Rotation, Revolution

Q:-4 Answer the following questions.

- Q:-1. What is universe ?

Ans:- The universe is defined as the totality of everything that exists. such as the sun, the moon, the star, the planets and the galaxy.

- Q:-2. Define rotation and revolution.

Ans:- Rotation is defined as the spinning of planet on its imaginary axis is known as rotation.

Chapter 2 The Earth

Q:-1 Tick(√) the correct answer.

- The shape of the Earth is:
(a) round **(b) spherical** √ (c) flat
- Large areas of land on the Earth's surface are called
(a) continents √ (b) satellites(c) oceans
- The movement of the earth around the sun is known as:
(a) rotation **(b) revolution** √(c) poles
- One rotation of the Earth on its axis is completed in:
(a) 365 days (b) 6 hours **(c) 24 hours**

Q: 2 Fill in the blanks.

- The Earth is surrounded by a layer of air called the.....(**atmosphere**)
- Fifth largest planet of the solar system is..... (**Earth**)
- The Earth revolves around the sun on its..... (**orbit**)
- The protective blanket around the earth is the..... (**Ozone**) layer.
- revolution of the earth around the sun causes the change of..... (**seasons**)

Q:3 Name the following.

- Planets larger than the Earth:
Ans: Jupiter, Saturn,Uranus and Neptune
- Planets smaller than the Earth:
Ans: Mercury, Venus,Mars
- Two flat ends of the Earth:
Ans: North Pole and South Pole
- The movements of the Earth:
Ans: Rotation and Revolution

Q:4 Answer the following questions.

- What is the shape of the earth?
Ans: The shape of the earth is spherical.

2 How many continents and oceans are there on the planet Earth? Name them.

Ans: There are 7 continents and 5 oceans on the planet Earth.

Pacific Ocean, Atlantic Ocean, Indian Ocean, Arctic Ocean and Atlantic Ocean are five oceans.

Asia, Africa, America, South America, Europe, Australia, Antarctica are seven continents.

3 Which gas in the atmosphere makes life possible on the Earth?

Ans: Oxygen and Nitrogen gases in the atmosphere makes the life possible on the Earth.

4 ' The Earth is a unique planet in the solar system.' Elaborate the statement.

Ans: The earth is a unique planet the solar system. It is the only planet which has life on it.

Kale Raja

5 How can you say that the Earth is the fifth largest planet in the solar system?

Ans: The earth is the fifth largest planet of the solar system. It is bigger than Mercury, Venus and Mars but smaller then Jupiter, Saturn, Uranus and Neptune.
